

SUSTAINABILITY IN SPORTS

Tackle Climate Change - Play for the Planet

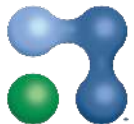

Did you know only 17% of facilities & teams are tracking their emissions? The future of sporting events is sustainable. [ClimeCo](#) makes it easy for the Sports Industry to offset its carbon footprint & fund ocean-bound plastic cleanup projects. Leverage the power of sports entertainment to accelerate meaningful change in the industry. For the planet. For the fans.

CLIMECO'S PLATINUM SERVICE

- Calculate carbon footprint & plastic footprint
- Custom portfolio of certified carbon & plastic credits
- Create marketing copy (PR, social, newsletter, etc.)
- Pitch to our network of media outlets
- Cross-promote across ClimeCo's marketing channels

Dan Linsky | dlinsky@climeco.com

I've always had an interest in understanding & caring for the environment. Training and competing in the sport of skeleton requires significant air and vehicle travel, which contribute to global GHG emissions. With offsets, I am able to balance chasing my Olympic dream while reducing my impact on the environment!

Jaclyn LaBerge
National Skeleton Racer
